

Web Engineering

Exercise organisation

Grading

Group registration

Exercise organisation

- There will be 5 exercises, **all** of which will count towards the coursework grade
- The exercises have been designed for groups of **three** students
- **Registration** is possible right after this introduction or by e-mail (lindad@inf.ethz.ch) until the end of this week
- If you register as a team of two, there is a chance that a third team member will be assigned to your group. If you do not have a team or miss today's registration, you will be allocated to an existing team

Grading

- The exercise descriptions contain a detailed list of the tasks to be completed
- For each exercise, you can be awarded up to a certain number of points (this will be specified in the exercise description)
- **Every team** will need to **present** (not hand-in) their solutions for the whole exercises to the assistants on the day specified in the exercise description

Grading

- Solutions are assessed **per team** (not per student) directly **in the exercise sessions**
- **Thursday**
 - **12-1pm** (directly after the lecture)
 - **1-2pm** (second slot)
- **Depending on the number of groups:**
 - An additional exercise session on Friday
 - Groups will be assigned to date slots
 - We will let you know about this possibility as soon as possible

Grading

- To demonstrate the solutions, at least one team member has to be **physically** present at the day of the deadline
 - The team members that will present the work **have** the responsibility to answer for all the parts of the exercise
- If your team **fails** to present the solution on the date specified, no points can be awarded
- We assume that each group is in possession of at least one laptop suitable enough to demonstrate the solutions

Team Play

- Be a team player!
 - If you drop out of the course, please inform your team (and an assistant) as soon as possible
 - If you cannot meet a deadline, contact your team buddies early enough
Do not wait until the very last day! This is just lame!
- We can and will deduct points for individual students that fail to contribute to their teams
- **However:** We cannot give your team points for non-existing solutions

Your responsibilities

- You are responsible for your team's performance
- You decide how to distribute the work among your teams
- In case there is a (motivation) problem with one of your team members, please contact Linda Di Geronimo (lindad@inf.ethz.ch) **early** enough
- If you have military service, contact me as soon as possible

“Before I begin, I’d just like to make it known that I didn’t volunteer to do this presentation.”

Technologies

- One of the main challenge in our web engineering exercises is the mastering of a diverse set of technologies
- Technologies being used:
 - HTML5, CSS3
 - JavaScript
 - PHP, MySQL («Wordpress»)
 - Node JS, Socket IO
